DETAILED ACTION

Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-10, drawn to a torque activated brake assembly, classified in class 188, subclass 134.
 - II. Claim 11, drawn to a torsion spring, classified in class 267, subclass 273.
 - III. Claim 12, drawn to a brake plate, classified in class 188, subclass 218xl.

The inventions are distinct, each from the other because of the following reasons:

- 2) Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination has utility by itself. The subcombination has separate utility such as for use as a torsion spring in a recoil assembly.

- 3) Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination has separate

utility. The subcombination has separate utility such as in numerous brake devices where a ball ramp mechanism is used to actuate the brakes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C Kramer whose telephone number is 703-305-0839. The examiner can normally be reached on Mon-Fri 8-4.
